## EXPERIENCE

### Walla Walla University Chaplains Office

College Place, WA

Audio/Video Engineer

Sept. 2022 – June 2026

- **Mixed front-of-house (FOH) audio** for large-scale university gatherings with over 1,500+ attendees
- Directed multi-camera broadcast production teams for designated high-profile, university-sponsored events
- Maintained strict quality standards and collaborative composure in fast-paced, high-pressure live environments

### Walla Walla University Dept. Computer Science

College Place, WA

Lab Admin

Dec. 2024 – June 2025

- Built and deployed a **Zabbix monitoring service** across Department operated servers and desktop computers
- Maintained physical network infrastructure and assisted IT departments with hardware lifecycle updates
- Developed meticulous documentation habits, authoring clear, detailed system instructions for internal users

### Rex Plastics

Vancouver, WA

Machine Operator

July 2025 – Sept. 2025

- Operated commercial-grade injection molding machinery safely and efficiently within high-volume cycles
- Conducted meticulous quality assessment and cleaning workflows for thousands of physical components daily
- Consistently hit strict production throughput timelines while maintaining excellent quality control standards

## PROJECTS

### Web Inquiry using RAG

Jan. 2026 – March 2026

- Architected a Retrieval-Augmented Generation (RAG) system using **Ollama** and **Qdrant** to build an agentic assistant
- Implemented data pipelines to index complex game lore documentation, optimizing query accuracy and speed
- Authored a technical paper tracking visual metrics, data latency, and RAG vector response performance findings

### RC Truck Lights Architecture

Sept. 2024 – Aug. 2025

- Engineered fully functioning, street-legal indicator lighting systems for a 1/8 scale Radio Controlled vehicle
- Programmed microcontroller routines using **Arduino** to process inputs and govern custom LED arrays
- Designed and integrated low-side driver circuits to ensure robust signal isolation and power optimization

### Spotify API Radio Synchronization

Sept. 2023 – May 2024

- Built a Python-based automation pipeline connecting to digital, web-hosted live radio feeds
- Parsed real-time metadata streams using programmatic APIs to scrape currently playing broadcast tracks
- Leveraged the Spotify Web API to dynamically cross-reference, find, and sync songs into custom user playlists

## EDUCATION

### Walla Walla University

College Place, WA

Bachelor of Science in Computer Science, Minor in Mathematics

Sept. 2022 – June 2026

- **Focus Areas:** Embedded Systems, Advanced Mathematics, Artificial Intelligence, Computer Architecture
- **Activities:** Raspberry Pi standalone infrastructure engineering, systemd optimization, Python GUI development

## SKILLS

**Languages :** Python (MicroPython), C, C++, HTML/CSS, JavaScript (React.js), PHP, R, Dart, Lua, Java, SQL

**Tools & Frameworks :** Git/GitHub, Linux/Ubuntu, Zabbix, Qdrant, Ollama, Tkinter, Flask, Arduino, Figma
